Assignment 1

Jaswanth Chowdary Madala

1) A die has two faces each with number '1', three faces each with number '2' and one face with number '3'. If die is rolled once, determine
   a) $\Pr(2)$
   b) $\Pr(1 \text{ or } 3)$
   c) $\Pr(\text{not } 3)$

   Solution: The given information is summarized in the following table 1

RV	Description	Probability
$X = 1$	Die rolls to 1	$\frac{1}{3}$
$X = 2$	Die rolls to 2	$\frac{1}{2}$
$X = 3$	Die rolls to 3	$\frac{1}{6}$

   TABLE 1: Random variable X

   a)
   $$\Pr(X = 2) = \frac{1}{2} \qquad (0.0.1)$$

   b)
   $$\Pr(X = 1 \text{ or } X = 3) = \Pr(X \in \{1, 3\}) \qquad (0.0.2)$$
   $$\Pr(X = 1 \text{ and } X = 3) = \Pr(X \in \phi) \qquad (0.0.3)$$

   $$\Pr(X \in \{1, 3\}) = \Pr(X = 1) + \Pr(X = 3) - \Pr(X \in \phi) \qquad (0.0.4)$$
   $$= \frac{1}{3} + \frac{1}{6} \qquad (0.0.5)$$
   $$= \frac{1}{2} \qquad (0.0.6)$$

   c)
   $$\Pr(X \neq 3) = 1 - \Pr(X = 3) \qquad (0.0.7)$$
   $$= 1 - \frac{1}{6} \qquad (0.0.8)$$
   $$= \frac{5}{6} \qquad (0.0.9)$$
